Second Step of Supplier Integration on the SAP Ariba Platform

Dear Supplier,

We are pleased to announce the upcoming launch of the second step of supplier integration on the SAP Ariba platform (Commerce Automation Module).

This new approach aims to digitize the document exchange process, from purchase order notification to payment of invoices including delivery.

A gradual transition

To this end, a transition period has been defined for the progressive integration of suppliers into the platform. Before moving on to this module, each supplier will receive a personalized notification.

Significant benefits

- Traceability of document exchanges through an easy-to-use web portal.
- Real-time tracking of deliveries and invoices.
- Streamlined and reduced administrative costs.

Free access

Access to the Standard Account on the platform is free of charge. It entails no cost to the supplier.

Personalized support

Each registered supplier will receive, in due course, a detailed guide explaining the next steps. He will also benefit from functional training on how to use the SAP Ariba platform.

For any additional information, please contact [z-mohamedou@snim.com].

We look forward to meeting you frequently on our SAP Ariba platform thanks to this new initiative, and we extend our best regards.
